Subject Waste disposal extension

Edwin,

I have a remediated waste water that is approaching the 90 day accumulation limit on Saturday of this week and I'm having trouble scheduling a removal. Usually we send the water to Veolia in West Carrollton, OH every 90 days for disposal but I was informed that that facility had a fire and is not accepting shipments. They are in the process of finding a facility to take the water but that most likely won't happen before Friday. Can we get an extension on this waste water? Thanks for your time.

Jon
